

Comox Valley Hospital

Location: British Columbia

Market Sector: Healthcare

The new Comox Valley Hospital is a 400,000 sq.ft., 153 bed facility in B.C.

Our work included:

- 5,000 KW cooling plant
- 9,600 KW heating plant
- Numerous plumbing systems
- A central air handling plant for the entire building
- Plumbing and medical gas systems distributed throughout the building

We fully drafted and prefabricated the mechanical rooms prior to installing them on site.

The new facility is slated for opening late in 2017.
