

Century Downs Racetrack and Casino

Location: Alberta

Market Sector: Sports and Entertainment

Delivery Method: Bid and Spec

The new Century Downs Racetrack and Casino in Balzac, Alberta, features 550 slot machines, electronic table games, and a 5 ½ Furlong oval for Standardbred, Thoroughbred and Quarter Horse racing.

Modern Niagara provided all mechanical work, including plumbing, sheet metal, insulation, building controls, and sprinkler and fire safety system.

The project schedule was compressed to meet the casino's opening date. In less than 8 months we reached substantial completion. Our work began at the infant stage of underground piping. In order to reduce installation time on site and to stay within schedule, we pre-fabricated all the underground sanitary piping.

We worked successfully with a team of contractors and engineer to overcome the challenges and meet the needs of the client.
